 Chennai

PROFILE SUMMARY

- Python Developer with hands-on experience building projects spanning AI/ML, IoT, and REST API integration
- Strong foundations in C, C++, Java, SQL, and Object-Oriented Programming (OOP)
- Delivered a real-time weather application and recommendation engine during a 3-month internship at Elevate Labs, cutting manual location-lookup steps through automated geolocation-based data retrieval
- Solid grounding in Data Structures & Algorithms (DSA), database management, and software development fundamentals

EDUCATION

K.L.N. COLLEGE OF ENGINEERING	(2021 - 2025)
▪ B.E. Electronics and Communication Engineering	7.5
MARY ANN Matric. Hr. Sec. School	(2020 - 2021)
▪ Higher Secondary Certificate (HSC)	84.41
MARY ANN Matric. Hr. Sec. School	(2018 - 2019)
▪ Secondary School Leaving Certificate (SSLC)	82.22

SKILLS

- Languages : C, C++, Python, Java, SQL
- Web Technologies:HTML,CSS, Javascript,Flask
- Soft Skills : Leadership, Critical Thinking, Creativity, Problem solving
- Tools: Git, GitHub, VS Code
- Developer Tools: MATLAB, VS Code, MySQL, AWS, Google Colab, Git, GitHub
- Core Concepts: OOP, Data Structures & Algorithms (DSA), SDLC
- Soft Skills : Leadership ,Critical Thinker,Creativity, Problem solving

INTERN EXPERIENCE

- Elevate Labs
Python Developer (Jan 2026 - Mar 2026)
 - Maintained and enhanced a Python-based real-time weather application, integrating AI-driven location and manual city searches, cutting average lookup time from ~30 seconds to under 3 seconds across 50+ supported locations
 - Automated travel-window recommendations using an AI-powered engine that analyzed 4 weather metrics (temperature, humidity, rainfall probability, air quality) across current and historical data, improving suggestion accuracy by an estimated 35% over basic forecast lookups
 - Handled and maintained REST API integrations with robust JSON response processing in a modular Python codebase, automating data caching to reduce redundant API calls and improve app response time by roughly 40%

PROJECTS

- | | |
|--|----------|
| • Real Time Weather Analytics & Recommendation Platform | Mar 2026 |
| • Personal Portfolio & Project Showcase Platform | Feb 2026 |
| • SmartAgroBiz ML-Powered Farming and E-Commerce Solution | May 2025 |
| • Smart Signal Management for Emergency Vehicles Using IoT | May 2024 |

CERTIFICATIONS

- C Programming Basics ([LinkedIn](#))
- Introduction to Industry 4.0 and Industrial Internet of Things ([NPTEL](#))
- The Joy of Computing Python 2022 ([NPTEL](#))
- Python 3.4.3 (Spoken Tutorial, IIT Bombay)
- Basic JAVA Programming ([LinkedIn](#))
